Box	κ No. I	Basis of this opinion
1.		regard to the language, this opinion has been established on the basis of the international application in the language in which it was, unless otherwise indicated under this item.
		This opinion has been established on the basis of a translation from the original language into the following language, which is the language of a translation furnished for the purposes of international search (under
	•	Rule 12.3 and 23.1(b)).
2.		regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed nation, this opinion has been established on the basis of:
	a.	type of material
		a sequence listing
		table(s) related to the sequence listing
	b.	format of material
		in written format
		in computer readable form
	c.	time of filing/furnishing
		contained in the international application as filed.
		filed together with the international application in computer readable form.
		furnished subsequently to this Authority for the purposes of search.
3.		In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

#### 2. Citations and explanations:

The documents cited are numbered in the same order as they appear in the international search report.

The present invention relates to a synergistic fungicide composition containing a triazole-pyrimidine derivative (I) and propiconazole (II).

D1 describes similar compositions, compound (I) being substituted, however, by an analog. D2 describes compound (I) in combination with analogs thereof and lists (II) as a possible compound partner, while the claimed combination per se is not explicitly disclosed and no clear teaching exists in connection therewith. The present application therefore satisfies the criterion in PCT Article 33(2) because the subject matter of claims 1-10 is novel in relation to the prior art as defined in the Regulations (PCT Rule 64.1 to 64.3).

The present application contains comparative tests which involve precisely those compositions previously published in D1. These tests show unequivocally that the claimed choice makes possible not only a synergistic effect, but also an improved synergistic effect compared to the most

Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement.

Similar compositions to be taken from D1. This improvement was not to be expected. The present application therefore satisfies the criterion in PCT Article 33(3) because the subject matter of claims 1-10 involves an inventive step (PCT Rule 65.1 to 65.2).

The present application satisfies the criterion in PCT Article 33(4) because the subject matter of claims 1-10 is regarded as industrially applicable.
